

### Notice of Public Information Centre

The Lambton Area Water Supply System (LAWSS) provides the supply of water to residential, commercial and industrial users in Lambton County. Grid reinforcement of the south Sarnia/LAWSS network and twinning of the supply line to St. Clair Township is required to ensure an uninterrupted supply of water to high volume users.

LAWSS has retained AECOM Canada Ltd. to complete a Municipal Class Environmental Assessment (EA) in accordance with the requirements for 'Schedule B' projects as described in the Municipal Engineers Association's "Municipal Class Environmental Assessment" document (October 2000 as amended in 2007). As part of the study, a Public Information Centre (PIC) is planned to provide background information on the study, the various alternatives being considered, a comparative analysis of those alternatives and the recommended alternative. This PIC is scheduled for:

**Date:** Thursday, May 20, 2010  
**Location:** Council Chambers  
St. Clair Civic Centre, Mooretown  
**Time:** 4:00 pm – 8:00 pm

Representatives from LAWSS and their consultant, AECOM, will be available to answer questions, discuss the work completed to date and provide information on the next steps in the study. You are encouraged to attend and provide your comments. With the exception of personal information, all comments will become part of the public record. Comments received through the course of the study will be considered in finalizing the recommended solution. Following the PIC, the recommended solution will be confirmed, a Screening Report will be prepared and a Notice of Completion issued for public review and comment. Subject to approval of the Class EA, LAWSS may proceed with any recommended works.

If you are unable to attend this meeting and wish to provide comments or have any questions, please contact the following no later than June 3, 2010.

Mr. John Haasen,  
Project Manager
